Public Policy and Governance Design

The Biomatrix Public Policy and Governance Design Course explains the generic principles of how systems are organised, develop and change. It describes governance systems as sub-system of other systems (e.g. industries) and explains how (in)correct governance is responsible for (un)sustainable and (un)desirable societal development.

Participants use the public governance system of which they are a part as the case study system throughout the course. In template-driven assignments they identify and analyse problems, brainstorm solutions, create an ideal design, implementation plan and change management plan for transforming the case study system.

PARTICIPANT PROFILE

The programme is aimed at

- senior managers in government departments, NGOs and business organisations concerned with public governance, public policy design and implementation
- consultants, facilitators and change managers involved in the public domain, including policy design and industry regulation
- system analysts and other IT specialists concerned with structuring the information flow within and across public governance systems, industry regulation and monitoring and evaluating.

Facilitator: Dr Elisabeth Dostal

She is a leading systems thinker who co-developed Biomatrix systems theory and methodology. As a prominent systemic management consultant, researcher and educator, she has gained considerable experience about sustainable business and organisation development in private and public sector organisations and NGOs. She also taught on several South African and European MBA programmes, published in scientific journals, and is the author of two books. She established BiomatrixWeb, a consulting organisation with an education-driven approach to organisational and societal change and BiomatrixSchool, which delivers online courses on sustainable system design.

Programme modules

1. OVERVIEW OF BIOMATRIX SYSTEMS THEORY

This module explains the key concepts and methods of systems and complexity theories in general and of Biomatrix systems theory specifically. Self-reflection assignments promote a (w)holistic view of the world and of sustainability.

2. SYSTEMIC PROBLEM (DIS)SOLVING

This module explains the theory and practical steps involved in complex problem analysis and dissolving them through ideal system redesign. Assignments guide problem analysis and brainstorming of solutions for the case study system.

3. SEVEN FORCES OF SYSTEM ORGANISATION: ACTIVITY SYSTEM PERSPECTIVE

The module explains activity systems as value and supply chains based on seven organizing forces and their organising principles. Assignments guide the ideal redesign of the case study system.

4. IMPLEMENTATION PLANNING

This module explains how to make an implementation plan for an ideal design. Assignments guide the implementation planning of the ideal case study design.

5. CHANGE MANAGEMENT DESIGN

This module explains the theory and practical steps involved in managing the transformation of a system with stakeholder participation and alignment. Assignments guide the change management planning for the transformation of the case study system.

The programme as a learning investment

After completing the course the participants will be able to:

- think more (w)holistically and creatively
- explain the generic principles of how systems are organized, develop and change in a sustainable manner
- apply the theory and methodology of ideal governance (re)design
- facilitate problem analysis, brainstorming, system (re)design, implementation planning and change management for any public governance function
- explain the role and effects of fragmented versus systemic governance on (un)sustainable and (un)desirable societal development
- explain how national development policies ought to be designed, implemented and how this should be managed to create stakeholder alignment
- explain the different types of activity systems (i.e. project, function, business process, industry supply chain and governance function) and apply the generic knowledge of activity system (re)design and transformation to them.

The programme is presented online and participants will be required to complete individual assignments.

Fees

R14 000 (non-VAT payable)

Fees include programme materials and are payable before the commencement of the programme. A cancellation fee of 10% will be payable for cancelling fewer than 14 days prior to the commencement of the programme.

When and where

ONLINE:

Self-managed with a Certificate of Competence from Stellenbosch University:

STARTING:

15 June & 15 September

TIME COMMITMENT:

30 hours of video lectures and an average of 230 hours of study and assignments, to be completed within 12 months

Enrol now

Admission Requirements

No formal tertiary qualifications are required. Participants should have minimum English language competence at NQF level 4 or equivalent and some management experience.

NQF Alignment: Level 8

The scope and presentation of this programme are aligned with the National Qualifications Framework (**NQF**) level 8.

INSPIRING THOUGHT LEADERSHIP ACROSS AFRICA

At USB Executive Development (USB-ED) you will join a proudly African company that shares in the rich heritage and academic rigour of Stellenbosch University, yet offers the entrepreneurial culture of business. USB-ED was established as the designated public executive education provider within the University of Stellenbosch Business School (USB) in 2001. The company's footprint has since expanded across the continent, with local presences in South Africa (Cape Town, Johannesburg and Durban), in Addis Ababa, Ethiopia and in Dar es Salaam, Tanzania.

USB-ED has won the PMR.africa Diamond Arrow Award in three countries: Botswana, Namibia and South Africa.

The USB's international standing and reputation is confirmed by the triple crown international accreditations, EQUIS, AMBA and AACSB.
